*Sustainable Futures Curriculum Series*

-----

***Where do we get sustenance?  
How can we be custodians of the land?***

**Join Professor Julia Rose Sutherland (Material Art & Design) at the OCAD U Pollinator Garden for a demo on natural dye extraction. Work with plant dyes such as amaranth, indigo, and marigold. Learn about Professor Sutherland's approach to land-based learning as a way to decolonize practices and collaborate with the land.**

***Note: Participants are asked to bring a 1 litre glass jar with a lid and weather-appropriate clothing.***

# About Julia Rose Sutherland

*Photo of Julia Rose Sutherland  
Photo credit: Jasmine Jones*

# SUSTAINABLE FUTURES CURRICULUM SERIES

---

*The Sustainable Futures Curriculum Series* builds on OCAD U's ongoing collaborations to foster generative conversations and sharing on integrating sustainability into teaching and learning. The series is intended to enhance our curriculum approaches to Sustainable Futures and to develop further resources with, by, and for the OCAD U community.

*Questions about the series can be directed to Victoria Ho, Sustainability Coordinator:  
[vho@ocadu.ca](mailto:vho@ocadu.ca).*

## Pollinator Garden Site

-----

The above image shows the site of OCAD U's Pollinator Garden, outlined in bright green, before planting. The Pollinator Garden is located in Butterfield Park at 100 McCaul Street, directly behind the Above Ground Art Supplies store building.
